

LOGESHWAR C

Full Stack Developer

Porur, Chennai - 600116 | +91 82488 63743 | logeshwarchandrasekar@gmail.com | linkedin.com/in/logesh-chandrasekar08 | logeshchandrasekar.github.io

SUMMARY

Full Stack Developer and Computer Science Engineering graduate with hands-on experience designing, building, and deploying full-stack web and desktop applications using JavaScript, React, Node.js, and Python. Owns projects end-to-end — from database design and REST API development to responsive front-end interfaces — and has identified and remediated real security vulnerabilities through code review. Fast, self-directed learner who ships production-ready software independently and adapts quickly to new tools and frameworks.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML5, CSS3

Frameworks & Libraries: React, Node.js, Express.js, FastAPI, REST API, Tailwind CSS

Databases & Tools: SQL, PostgreSQL, MongoDB, N8N, Git, GitHub, Docker

EXPERIENCE

Software Development Project Contribution | Datacom (Forage)

Sep 2026

- Reviewed customer feedback for a live Cinema Finder web app (Australia/New Zealand) and prioritized 4 bugs and 8 feature requests.
- Traced a region-navigation bug to map bounds enforced only on initial load, then fixed it across MapLibre and Leaflet to constrain navigation to the supported region.

IoT Developer | Saveetha Institute of Medical and Technical Science

Mar 2025 - May 2025

- Built a gesture-controlled mouse (Arduino, MPU6050 accelerometer, PyAutoGUI) and compared SVM vs. Random Forest classifiers for gesture recognition, reaching ~92%/~90% accuracy with sub-150ms latency.
- Added haptic feedback for tactile input confirmation and was awarded Best Project of the Department for the work.

Data Science Intern (Remote) | IIT Kharagpur

Aug 2022 - Sep 2022

- Completed a remote data science internship affiliated with IIT Kharagpur (via Upskillz), applying data analysis and machine learning fundamentals to guided project work.

PROJECTS

ProgTrack AI Dashboard | Full Stack Desktop Application

Feb 2026 - Apr 2026

JavaScript, Electron.js, Chart.js, GitHub REST API

- Engineered a gamified developer productivity tracker in Electron.js with XP/achievement systems, coding-session logging, and goal management to help users build consistent learning habits.
- Built interactive analytics dashboards with Chart.js, including activity heatmaps and streak tracking, giving users real-time visibility into their progress.
- Integrated the GitHub REST API to pull and display live developer profile and repository statistics directly inside the app.
- Designed a rule-based AI insights engine that analyzes usage patterns and generates personalized learning recommendations.
- Debugged and resolved cross-platform packaging issues (CSP restrictions, ASAR bundling, icon integration) across a full v2.0 release cycle, improving app stability.
- Open-sourced the project on GitHub with complete documentation and a screenshot-illustrated README for other developers to adopt and extend.

TaskFlow | Multi-User Task Management Web Application

May 2025 - Aug 2025

React, Vite, Node.js, Express.js, SQLite, Tailwind CSS, JWT

- Built and deployed a full-stack multi-user task manager (React + Vite frontend, Node.js/Express backend) live on Render, with stateless REST APIs and per-user data isolation.
- Identified and remediated 3 security vulnerabilities — a hardcoded JWT secret, missing rate limiting, and a missing ownership check on subtask endpoints — through a self-driven code review, hardening JWT/bcrypt authentication before release.
- Rebuilt the UI in React with a dark-mode design system, drag-and-drop task reordering (SortableJS), and progress charts, layering in gamification (XP, streaks, levels) to boost engagement.
- Engineered a relational SQLite schema with cascade deletes to maintain data integrity across multi-user records.

EDUCATION

B.E. Computer Science & Engineering — Saveetha Institute of Medical and Technical Science, Chennai | 2021-2025 | CGPA: 8.00

Higher Secondary Certificate (HSC) — St. Paul's Matriculation Higher School, Porur | 2020-2021 | 85%

Secondary School Leaving Certificate (SSLC) — St. Paul's Matriculation Higher School, Porur | 2018-2019 | 78%

CERTIFICATIONS

Python Programming - HCL GUVI • JavaScript Programming – Codecademy • Cloud Infrastructure 2025 - Oracle

Full Stack Development - Great Learning Academy • Career Essentials in Generative AI – Microsoft & LinkedIn Learning
