

Objective

Enthusiastic and detail-oriented **Computer Science Engineering** with a strong foundation in both frontend and backend development, seeking an opportunity as a **Full Stack Developer** or contributor in project-based roles. Passionate about designing and building robust, scalable, and user-centric end to end web applications. Proficient in technologies such as **Python, JavaScript, React, Node.js** and databases, with a keen interest in delivering high-performance solutions. Eager to apply technical knowledge in real-world scenarios while continuously learning and advancing within the evolving tech landscape.

Technical Skills

Programming Languages : Python, HTML5, CSS3, JavaScript, Node.js

Frameworks & Libraries : Django, FastAPI, Express.js, React, Tailwind

Databases & Tools : MySQL, PostgreSQL, Git, Github, Docker

Education

B.E Computer Science & Engineering

2021 - 2025 ~ **CGPA - 8.00**

[Saveetha Institute of Medical And Technical Science](#)

Chennai, India

HSC

2020 - 2021 ~ **85%**

[St.PaulsMatriculationHigher School](#)

Porur, Chennai

SSLC

2018 - 2019 ~ **78%**

[St.PaulsMatriculation Higher School](#)

Projects

Taskflow - Multi-User To-Do Live Web Application

[Feb 2026 - Apr 2026](#)

- System Architecture: Deployed a client-server RESTful API on Render with stateless communication and **multi-user** data isolation.
- Backend Engine: Built a Node.js/Express server featuring secure JWT **session authorization** and bcryptjs password hashing.
- Frontend Interface: Developed a sleek, **responsive UI** using Tailwind CSS and vanilla JS with dark-mode toggling and SortableJS reordering.
- Database Design: Engineered an SQLite database with optimized **relational schemas** and cascade deletes to ensure strict data integrity.

ProgTrack AI Dashboard - Full Stack Application

[Mar 2026 - May 2026](#)

[JavaScript, Electron.js, Chart.js, GitHub REST API]

- Developed a developer **productivity tracker** with learning progress monitoring, coding session logging, and goal management features.
- Designed **interactive analytics** dashboards with activity heatmaps, streak tracking, and progress visualization using Chart.js.
- Integrated GitHub **REST API** to fetch and display real-time developer profile and repository statistics.
- Built a rule-based AI insights system that **analyzes user activity** patterns and generates personalized learning recommendations.

Certifications

- Data Science - **IIT KGP**
- Cloud infrastructure 2025 - Oracle
- Python Programming – Codedex
- Full Stack Course – Great Learning Academy
- Javascript Programming – Codecademy
